

ORGANIC SUMMIT 2025

How to achieve 25 pct. organic production and consumption by 2030 in the EU

Welcome to the first Organic Summit in the world's organic capital Copenhagen, Denmark, August 18-19, 2025. You will attend a conference where the future of agriculture and food-consumption is challenged and formed with a focus on how to achieve 25 pct. organic production and consumption by 2030 in the European countries.

Join decision-makers, researchers, practitioners, and politicians, as well as organizations and companies to share, discuss, and get inspired. And be part of a summit that creates a charter that will be the starting point of a much more comprehensive conversation about the potential and challenges of organic agriculture to play a more decisive role in shaping the future of farming.
